

Phone Number Intelligence

Actionable number data that provides key insights to strengthen user authentication, prevent fraud, and enhance user experience.

With Phone Number Intelligence, get full visibility into any number: messaging app presence, digital user account information, carrier info, and validation status. Spot virtual numbers, view porting activity, detect breach exposure, and run image-based identity checks using AI. It's a comprehensive solution for fraud detection, trust signals, and intelligent user profiling.

MESSAGING APPS INFO

Uncover which messaging apps are used by the target phone number.

Connected Accounts

	Linkedin	CONNECTED	▼
Full Name		John Smith

	WhatsApp	CONNECTED	▼
	Amazon	CONNECTED	▼
	Google	CONNECTED	▼
	Instagram	NOT CONNECTED	▼

ONLINE PRESENCE

Reveal which popular web services are associated with the phone number.

PHONE NUMBER VALIDATION

Validate contact details by checking the type and status of any phone number globally.

General Information		
Phone number	+44 7710 12345	✓
Status	Connected	✓
Number Type	Mobile	✓
Carrier	EE	✓
Times Ported	0	✗
Country	UK	✓
Full Name	John Smith	✓

CARRIER INFORMATION

Identify the Mobile Network Operator linked to the phone number.

DISPOSABLE PHONE DETECTION

Instantly detect virtual phone numbers available for temporary use.

PORTING HISTORY

View the number and dates of all phone number porting events across providers.

Phone Lookups		
USA	+1 917 1234567	DISPOSABLE
Germany	+49 151 1234567	
Unated Kingdom	+44 7710 123456	
France	+33 6 12 34 56 78	DISPOSABLE
Australia	+61 4 1234 5678	
Japan	+81 90 1234 5678	
Brazil	+55 11 91234 5678	

DATA LEAKS MONITORING

Access insights from a vast library of known data breaches in which the assessed phone number was found.

000Stealer

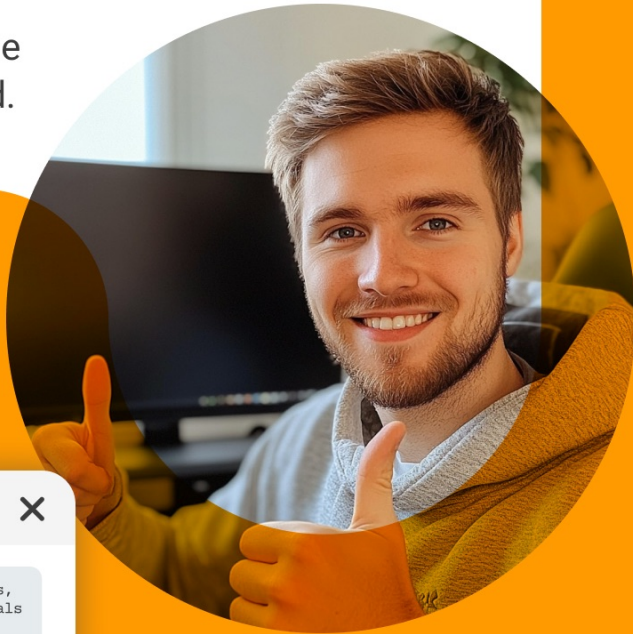

Tria Stealer is a mobile malware targeting Android devices, first found in 2024. Disguised as legitimate apps, it steals SMS, call logs, and messages from apps like WhatsApp and Gmail. Stolen data is sent to attackers, enabling account takeovers and financial fraud.
